Responsive Solutions · Trusted Partner · World Class Technology

ORGANIZATIONAL STRUCTURE

We solve our customers' most demanding challenges with ground-breaking solutions that allow them to succeed and prosper. We do this through two specialized business sectors, each with their own set of core competencies. This focused business model enables us to develop, field and support our customers' missions through resilient, cost-effective solutions.

SERVICES & SOLUTIONS

Our Services & Solutions business sector is armed with a core expertise in information technology solutions, decision support and other services. It also specializes in solutions and systems for defense operational and readiness environments.

- *Space Engineering Services*
 - Mission integration and control
 - Spacecraft integration
 - Communications and telemetry operations and management
 - Launch support
 - Vehicle systems engineering
 - Environmental testing – structural, electromagnetic, space simulation
 - Safety and mission assurance
- *Software Solutions / Enterprise IT Services*
 - IT infrastructure
 - Software design, development and engineering
 - Systems and network engineering and operations
 - Security and network operations
 - Cloud transition
 - Tactical and mobile communications
 - Global communications
- *Systems Engineering and Integration*
 - Mission engineering
 - System development
 - Research and development
 - Enterprise network and security engineering
 - Program management
 - Systems engineering and technical assistance
- *Training / Modeling & Simulation*
 - Modeling and simulation of threats, systems and effects
 - Mission Planning and rehearsal

- Curriculum development and delivery
- Aviation training to Foreign Military Sales
- Joint exercise development and execution

- *Logistics / Life-Cycle Management*
 - Enterprise logistics systems development and operations
 - Data collection and analysis
 - Autonomic logistics
 - Condition based maintenance
 - Field engineering and in theater services
 - Program information management

- *Cyber Intelligence*
 - Enterprise network and security engineering
 - Infrastructure and critical personnel protection
 - Open source internet analysis
 - Cyber intelligence production and analysis
 - Managed services and device integration

TECHNOLOGY SOLUTIONS

Our Technology Solutions sector delivers advanced engineering and research and development services to an international clientele of government, civilian, utility and commercial markets.

- *Defense and security products and services*
 - Survivability and force protection
 - Shoulder-Worn Acoustic Targeting System (SWATS™)
 - Rocket-propelled grenade vehicle protection (Q-Net™)
 - Add-on appliqué vehicle armor system (LAST® Armor)
 - Blast mitigating seat technology (BlastRide™)
 - Unmanned systems and robotics
 - Advanced robotic tracked vehicles (TALON®)
 - Small unmanned ground vehicles (Dragon Runner™)
 - Modular advanced armed robotic system (MAARS®)
 - Unmanned surface vehicle (Blackfish)
 - Robotic controller kit for Bobcat® loaders
 - Maritime and transportation
 - Aircraft carrier launch and capture systems
 - Air traffic management systems
 - Perimeter and critical infrastructure security
 - Maritime unmanned systems
 - Oceanographic and mapping solutions
 - Maritime and transportation systems integration
 - Maritime and transportation support services

- High-end research & development

- Rapid design and product delivery
