

Logistics Solutions

SAVE TIME. REDUCE COSTS. BOOST READINESS.

Improving the overall efficiency and readiness of support systems in all sectors of the defense industry is critical. At QinetiQ North America, we leverage advanced technology and innovation to create the next generation of logistic solutions and life-cycle support.

In any tactical situation, knowing what resources you have, where they are, and their operational status can mean the difference between success and failure. We provide our customers with mission planning components that, when combined, provide an integrated solution, allowing you to plan and support your mission with confidence.

Our logistics team has broad experience across the full spectrum of life-cycle logistics support activities that are germane to modern military and the future of our nation's defense. We have extensive experience fielding systems across the Department of Defense (DoD), in both single service and joint applications. We provide project management, fielding, implementation, training, data conversion, functional and technical software development and full life-cycle documentation for advanced DoD acquisition programs. We have fielded the Army's Aviation Logistics Management System to over 50,000 soldiers in over 500 different units worldwide.

Our strong track record of providing comprehensive training services has enabled us to accomplish diverse and unique DoD requirements. For example, we established the military flight training school in Iraq to help rebuild the Iraqi Air Force.

OUR LOGISTICS SUPPORT OFFERINGS INCLUDE:

- Unit Level Logistics System-Aviation (Enhanced)—ULLS-A(E)—Manned & Unmanned
- Data collection / analysis
- Worldwide Reliability and Maintainability (RAM)
- Condition Based Maintenance-Data Warehouse (CBM-DW)
- Flight data / trend analysis (FlightViz® / FlightAnalysis®)
- Interactive Electronic Technical Manuals (IETMs)
- Mission Distribution System (MDS)
- Mission Planning with Confidence
- Program Control Systems (PCSII)
- Reliability Improvement through Failure Identification and REporting (RIMFIRE®)
- Fleet Management Solutions
- Business Intelligence Solutions
- Aircrew Training Programs

ABOUT QINETIQ NORTH AMERICA

A U.S. firm with a 50-year heritage of defense innovation, QinetiQ North America's legacy of customer intimacy and proven performance continues in our globally honored technological capabilities and solutions. We are an independent, innovative technology provider that earns over a billion dollars in revenue, operating with small company speed and agility while leveraging significant global resources. More than 6,000 QinetiQ North America engineers, scientists and other professionals have the mission knowledge and proven, reliable performance to meet the rapidly changing demands of national defense, homeland security and information assurance customers. QinetiQ North America is part of QinetiQ Group PLC (LSE:QQ), one of the world's leading defense and security technology companies. We bring more than 4,000 patented solutions and technologies created in one of the free world's largest defense laboratory systems. Offering the agility of best-in-class entrepreneurial subsidiaries, our corporate culture rests on cutting-edge science and creative practical application.

OUR CAPABILITIES

Talented engineers, scientists, program managers and other professionals deliver:

- Information Technology Services & Solutions
- Cyber Security & Cyber Operations
- Network Architecture, Engineering & Operations
- Mission Operations, Engineering & Logistics
- C4ISR and Counterintelligence Solutions
- Unmanned Systems & Survivability Technologies
- Weapons Systems Analysis on Delayed Desert Damage & Degradation
- On-Board Health Usage Monitoring Systems (HUMS)

OUR CREDENTIALS

QinetiQ North America operates globally under the most exacting standards:

- Software Engineering Institute CMMI® Maturity Level 3 & Capability Level 4 for Verification
- ERIS and IRS Chief Counsel Projects - CMMI® Maturity Level 2
- ISO 9001:2008 Quality Management System Certification
- ISO 20000-1:2005 IT Service Management Certification
- Certified Lean Six Sigma Analysts
